#### Section—IV

**Directions :** Read the following passage and answer the questions (Q. Nos. 41–50) given below following the instructions.

It is not wrong to be attacked by self-pity any more than it is wrong to have a cold in the head—both are the result of some sort of disorganization of the frame. What is wrong, in both cases, is to allow oneself to be incapacitated by it. What could help many people out of the self-pitying condition would be to realize how ugly and ill-mannered and boring a thing it may become.

A display of tragic grief at a moment of mental agony is a very impressive thing, but it cannot be harassed beyond a certain point; and the complacent display of artificial misery is as objectionable a thing in the moral world as is the habit of incessant sniffing in the physical region. It may be very comfortable to sniff if one feels inclined; but what sniffers do not realize is that instead of evoking sympathy, they evoke nothing but a sort of contemptuous irritation in others. To indulge in self-pity is not only an abnegation of courage; it is an insult to the great, interesting, exciting world.
